

Installation Project Examples – Tank Decommissioning

CTSL offer the following range of tank decommissioning services:

- de-gassing and making safe
- water and foam-filling
- dismantling, remediation and reinstatement.

Credit will be offered for any scrap value associated with decommissioned tanks and any unwanted re-usable oil.

In addition to the tank decommissioning work, CTSL can provide in house remediation and groundworks services to ensure that complete and comprehensive tank decommissioning is undertaken in line with client requirements.
